PRINCIPLES OF RISK ASSESSMENT COURSE

PRINCIPLES OF RISK ASSESSMENT

This course is designed to assist those employees who are required to undertake assessments of health and a safety risk assessment, especially line managers and supervisors.

WHO NEEDS THIS COURSE?

Employees who are required to undertake risk assessments

LEARNING OUTCOMES

- Understand the '5 Steps' principle of suitable and sufficient risk assessment as outlined by the HSE
- Identify a range of hazards

- Identify who might be harmed and how, and understand how to evaluate the risks
- Understand how existing and additional control measures can help reduce residual risk
- Understand the legal obligations for employers relating to risk assessments and terminology used

DURATION

1 Day

MAX NO OF DELEGATES

Up to 10 delegates
